Special Note On Facilities and Environment

Camp Cherokee has many open air roofed and screened facilities. These areas are cleaned multiple times prior to Camp opening and weekly by groups during/after each group's use. Due to being open air, there is a consistent issue with dust, pollen, other airborne debris, moisture and critters. These do make their way into structures depending on what is blooming, blowing and hatching that week/day. Though every effort is made to control such situations, many times nature brings instances that are beyond our control. Thank you for your understanding of such situations. We ask for your assistance in communicating this, as well as ask your participants' and group helpers' to clean/prepare areas as necessary that they may see issues with.
